

IN THE SPECIFICATION

Please amend the paragraph beginning at page 8, line 4 as follows:

Figure 3 shows an adhesive system comprising a first backing substrate [[1]] 40, in the form for example of a paper web. Opposite said substrate [[1]] 40 there is a second web-form backing substrate 41, which may likewise be in the form of a paper web or a film web. Between the first backing substrate 40 and the second backing substrate 41 there are an adhesive layer 42 and a barrier layer 43.

Please amend the paragraph beginning at page 9, line 30 as follows:

The representation of Figure 4.3 shows a further design variant of a multiple cascade die 1. The multiple cascade die 1 depicted in Figure [[5.3]] 4.3 comprises a middle section 62 of wedge-shaped construction and also a first side section 63 and a second side section 64. The first side section 63 and the second side section 64 abut bearing surfaces 65 of the middle section 62, of wedge-shaped construction, of the multiple cascade die 1. Between the bearing surfaces 65 of the middle section 62 and the areas of the side sections 63 and 64 that face them there are, on the one hand, the supply lines 53 and, on the other hand, the channels which extend out from the storage channels 60 to a channel aperture 61.
